Thanks all.

I have added in Art Flaks in OSRTI, who will now be OSRTI's primary contact on the IAs and funding issues related to the independent study, and potentially other OSRTI/remedial related funding issues if they arise. I have also copied Bob Jennings, our new Resources Management Division director in OSRTI, and Melanie Keller and Cheryl Hawkins, who are helping us track all of the GKM related activities in OSRTI. Just so folks know – please share as appropriate.

I say we do the EFA to get things rolling with BLM.

Hi David, Tom: , We do not have an IA in place to quickly bring BLM on board for the BOR peer review and the system will likely take a month to do that. It was my understanding that you want these peer review agencies (BLM, USGS, and COE) on board within two weeks of last week. USGS and COE are on board. If this is the timing, we can justify an Emergency Funding Action for BLM which our incident response commander (David) can sign--and we do the paperwork later. Please verify the timing we need. If this is not such an emergency and can wait a month, I will begin negotiations on the new IA with BLM.

Robin - we will ask the question of BLM on our end (re:Region 9).

Let me know if you hear something first on that issue from your end.

Thanks. Have a nice weekend.

Your email went to junk again. Such fun. So do you know if there is a BLM IA in place in Region 9? If so, perhaps they can place it??? I am calling our Seattle IA office now to find out. HQ doesn't care where they send the money but if there is an IA in place with a SOW that covers this work and is bulk funded for drawdown, that works the cleanest.
